

Digital View driver boards are designed to enable and optimize the features and benefits of E Ink based displays

SP6-133 Interface Board: Supports the E Ink 13.3" Spectra 6 panels. The SP6-133 operates as a TCON and controller board for the 13.3" E Ink Spectra 6 panel and media players such as the Digital View STM-100 or boards such as the Raspberry Pi models. In addition there is a build option for an onboard ESP32 MCU.

Specifications

- Panels: E Ink 13.3" Spectra 6 models.
- Input: USB-C. ESP32 option with Wi-Fi
- Image format: JPG, BMP
- Functions:
 - USB to SPI with power management
 - Programmable ESP32 MCU option
 - Power input: 5V DC on USB-C
 - Connection to panel: FFC

Digital View enables digital display systems.
